

I want to register my shock and anger that Sinclair Broadcasting plans to force their stations to run a documentary that is blatantly anti-Kerry just before the election. They were not given the right to use our air waves to pursue their own partisan agenda.

As the agency created to protect the public interest in regard to use of our air waves, the FCC should forbid Sinclair Broadcasting from forcing this so-called documentary on the public. Do your job! To do less is to seriously interfere with the democratic process and the outcome of the Presidential election.
